Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claim 2-9, 11-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 6,129,701 to Cimino and further in view of US Patent No. 4,445,509 to Auth. Cimino teaches a fitting adjacent 14 the proximal end, the fitting includes an irrigation port 16 and a suction port 11; an irrigation cannula 21 attached to said fitting in fluid communication with said irrigation port, said irrigation cannula defining an irrigation path from said proximal end of the debridment extension to the distal end of the debridment extension; a suction cannula 21 attached to said fitting in fluid communication with said suction port, said suction cannula defining a suction path from the proximal end of the debridment extension to the distal end of the debridment extension; and a debridment tip (figure 4-6) affixed to the distal end of the said debridment extension, said debridment tip in fluid communication with both said irrigation and suction paths, the debridment tip having a plurality of irrigation apertures 29 and 30 spaced about the periphery of the debridment tip, whereby an amount of irrigation fluid in the irrigation path traverses the irrigation apertures and exits the debridment tip. The irrigation cannula comprises an inner cannula 20 and the said suction cannula comprises an

outer cannula 21 surrounding the inner cannula. (Figure 6) The irrigation aperture are spaced about the periphery of the tip in ninety degree intervals (figure 5).

Cimino however does not teach an external flute as described by the applicant. Auth teaches an external flute.

Therefore it would have been an obvious to one having ordinarily skill in the art to have added external flutes to Cimino's apparatus, because according to Auth the external flutes allow for plaque and other obstructions to be removed from organic structures without damage to normal tissue.

Response to Arguments

2. Applicant's arguments with respect to claims 2-9, 11-21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3763

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
